

LET THEM EAT LOBSTER

Direct Seafoods says that in spite of the credit crunch, caterers won't be able to resist its Clearwater premium hardshell fresh lobsters. Tender and succulent, the lobsters are harvested at their peak, when the meat content is at its highest and the shells are at their hardest. The result is a meat content of up to 50% more than soft shell lobsters that is available all year round. The lobsters are available in a range of seven sizes. The smallest, Chix, is between 454g and 527g and Selects is between 931 and 1362g.

The Clearwater range also includes scallops, Arctic surf clams, cold water shrimp, Argentine scallops and crab.

Direct Seafoods has also launched Strom cod that flakes gently and has a mild and sweet flavour.
